

### Creating Kafka Consumer Application

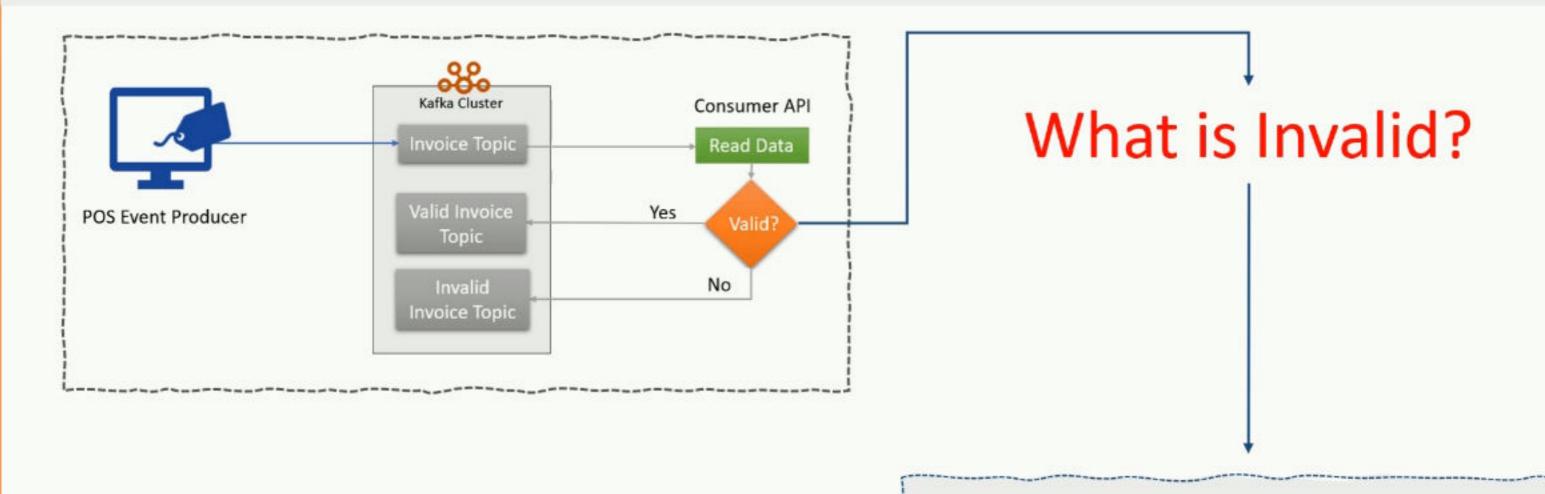

#### Problem Statement

### Creating Kafka Consumer Application

Delivery Type = **HOME DELIVERY** 

AND

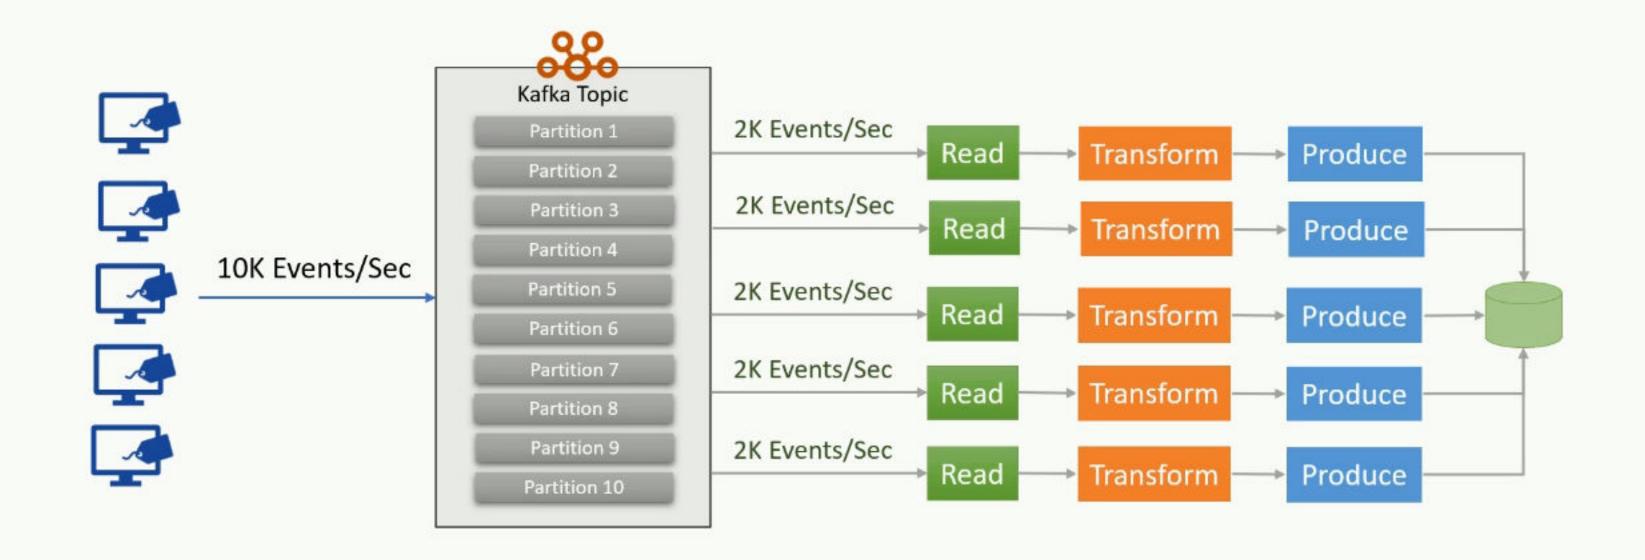

Delivery Address -> Contact No = NULL

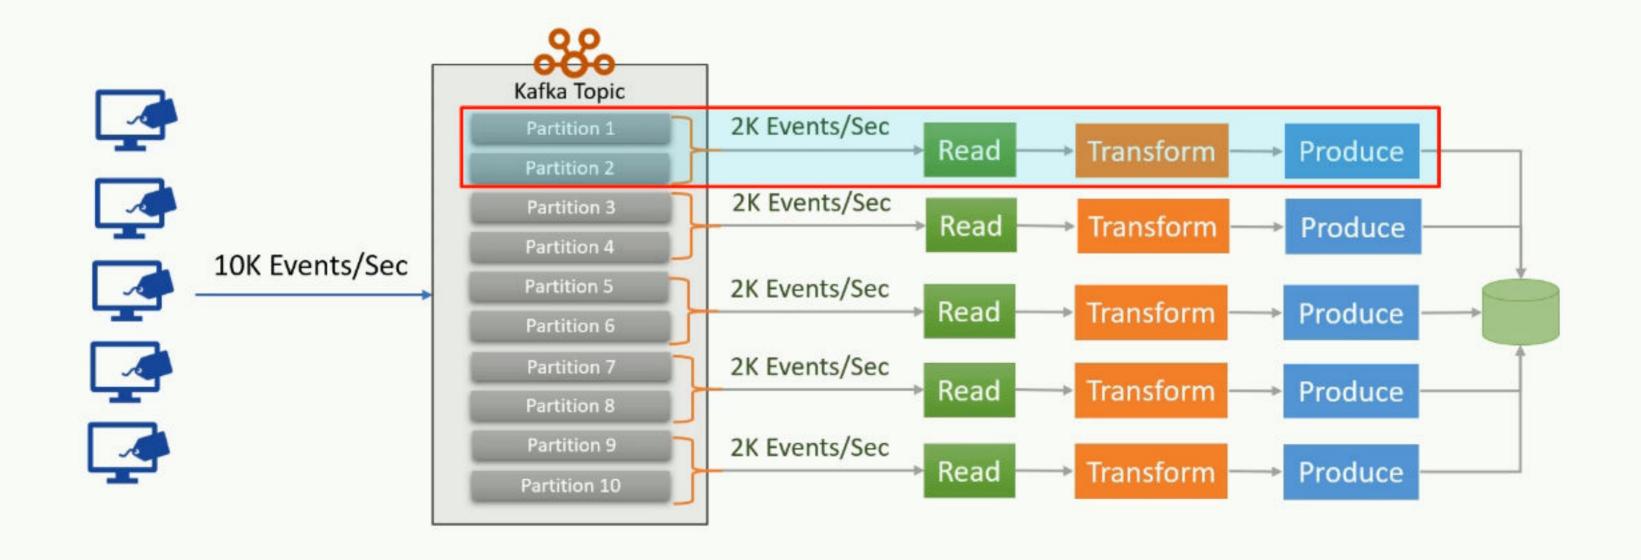

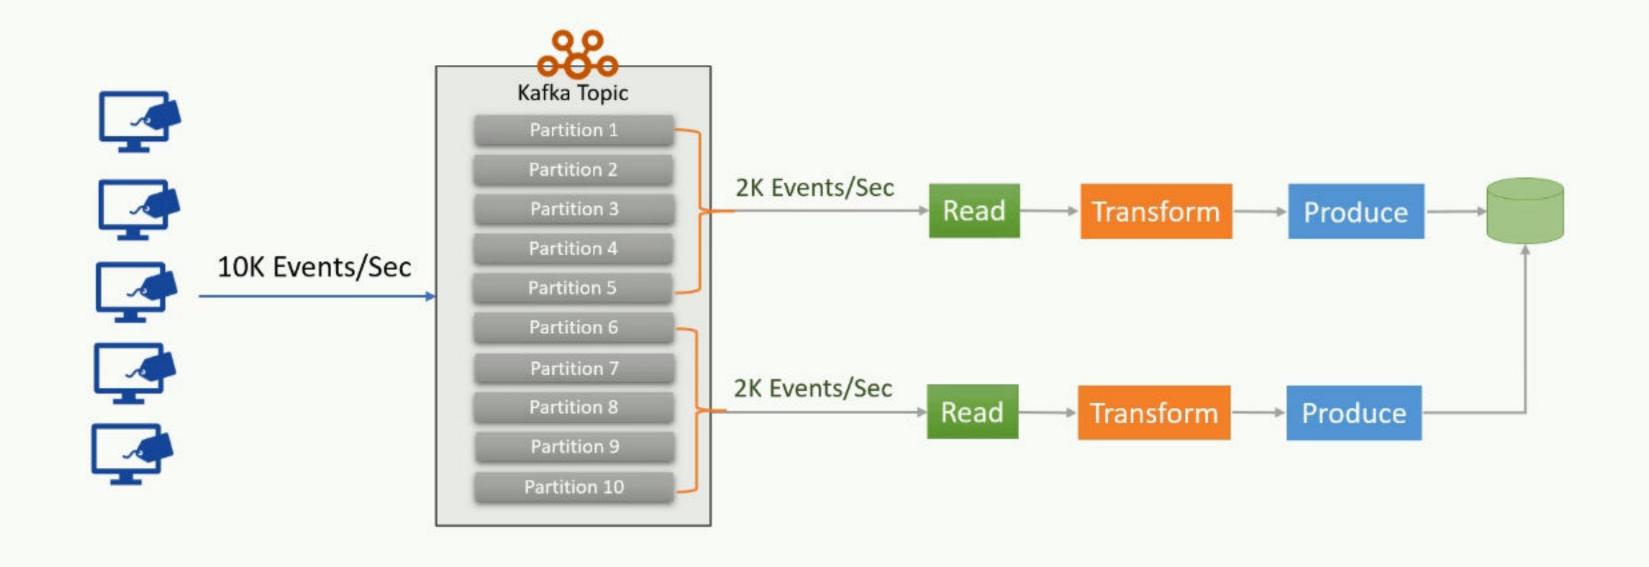

```
35
               KafkaConsumer<String, PosInvoice> consumer = new KafkaConsumer<String, PosInvoice>(consumerProps);
36
               consumer.subscribe(Arrays.asList(AppConfigs.sourceTopicNames));
37
38
               Properties producerProps = new Properties();
3.9
               producerProps.put (ProducerConfig. CLIENT ID CONFIG, AppConfigs.applicationID);
40
               producerProps.put (ProducerConfig. BOOTSTRAP SERVERS CONFIG, AppConfigs.bootstrapServers);
41
               producerProps.put (ProducerConfig.KEY SERIALIZER CLASS CONFIG, StringSerializer.class);
42
               producerProps.put (ProducerConfig. VALUE SERIALIZER CLASS CONFIG, JsonSerializer.class);
43
44
               KafkaProducer<String, PosInvoice> producer = new KafkaProducer<String, PosInvoice>(producerProps);
45
46
               while (true) {
47
                    ConsumerRecords<String, PosInvoice> records = consumer.poll(Duration.ofMillis(100));
48
                    for (ConsumerRecord<String, PosInvoice> record : records) {
49
                        if (record.value().getDeliveryType().equals("HOME-DELIVERY") &&
50
                            record.value().getDeliveryAddress().getContactNumber().equals("")) {
51
52
                            //Invalid
                            producer.send(new ProducerRecord<>(AppConfigs.invalidTopicName, record.value().getStoreID(),
53
54
                                record.value()));
                            logger.info( 5: "invalid record - " + record.value().getInvoiceNumber());
55
56
                         else {
57
                            //Valid
                            producer.send(new ProducerRecord<>(AppConfigs.validTopicName, record.value().getStoreID(),
58
                                record.value()));
59
                            logger.info( 5: "valid record - " + record.value().getInvoiceNumber());
60
61
62
63
64
66
```
